

**EDITORIAL****EDITORIAL**

Dear Reader,

First of all I extend my warm greetings. We have almost covered 8000 of visitors since the inception of the Journal. It is also indeed very happy to say that we trace the visitors from different parts of the world through the Goggle analytics features. Since February 2015, India is in the top ranking position of online visitors followed by Unites States, Russia, China, Japan, Germany, Pakistan, UK and Brazil respectively.

Technology specially the role of ICT has created an Invisible world which we generally called “virtual world”. Invisible society is an outcome derived from the virtual world. Today the world is accessible seamlessly in terms of information from any corner. In this era of Technology particularly the ICT, it has brought a lots of innovation in different subject disciplines. It is observed that most of the times that an individual thinks, executes and also get rewards/feedback to its work through ICT. All the major disciplines, Social Sciences, Humanities and Scientific disciplines like biotechnology, bioinformatics, pharmaceutical science, disciplines of pure sciences(Botany, zoology, Mathematics, Physics, Chemistry, etc) has tremendously using the products of ICT for different research and other innovative works. ICT has created a virtual environment for the scientific researchers where they can get the results of their research as that of the real time environment. Today, Medical Sciences whether it is related with surgery, drugs etc, are able to perform difficult surgical or drugs experiments through the medium of Information technology. Currently, India is a country with vision of “Digital India”, “Skill and Entrepreneurship development etc. The use of ICT in the perspective of content creation, e-learning can lift such objectives and the visions. Although, ICT has covered in the urban and sub-urban areas but still its implementation is not fully satisfactory at the rural level especially in the institutions of rural areas. Therefore, through this column, I urged the entire expert in the respective domain areas to make best use of ICT and also disseminate their works though ICT so that the great vision like skill India, Digital India can be reached out successfully.

*With Best wishes*
