

**EDITORIAL****EDITORIAL**

Dear Readers,

Very recently, we have seen a boom in Pharmacy Profession in India and are expecting a lot more in the years to come. One of the reasons behind this is the “Make in India” slogan by the Indian Prime Minister which has given a push to the Industrial sector of the country. The same is reflected by the Admission to Various Pharmacy courses like Diploma and Bachelors Degree.

At a time when admission to various Streams like Engineering and MBA has experienced a setback, almost all seats of Degree and Diploma courses of Pharmaceutical Science are filled across states.

But, the area of concern remains the Research and development sector, which need a lot more help from the Govt. and other allied agencies. With developed facilities our research can also grow to its full potential. And most importantly every industry to sustain requires continuous research and development.
